TO OBTAIN A BUILDING PERMIT, THE FOLLOWING ITEMS ARE NEEDED:

1. Completed application.
2. Two (2) sets of detailed construction drawings.
4. Manufacturers truss details, Lam Beam or I-Joists specifications and design.
5. Sealed Engineered lumber specifications must be submitted before Rough-In Inspection.
6. Sizes and U values of windows and doors (If applicable)
   (Indicate Prescriptive Method or submit 2009 REScheck with inspector checklist).
8. Signed and Notarized owner affidavit (If applicant is not the owner)
9. Additions, attached structures including decks, porches and garages require a site plan
10. All fees paid. (See fee schedule)

NOTE: After the above submitted information has been reviewed and approved, your permit will be mailed to you.

* NOTE: If deck is larger than 20 square feet an electrical receptacle is needed.

**NOTE: NO WORK SHALL COMMENCE INCLUDING BUT NOT LIMITED TO
EXCAVATION/DIGGING/CONSTRUCTION WITHOUT A BUILDING PERMIT BEING ISSUED.

REQUIRED INSPECTIONS: (If applicable)

1. Footings pre pour
2. Footings post pour (only for post holes for deck, porch, etc...)
3. Underground plumbing on test (5’ head of water)
4. Reinforced vertical walls pre pour
5. Radon/slab pour pre pour, plastic in place
6. Foundation/drain tile/sill plate, bracing or first floor joists in place
7. House wrap (windows set and taped
8. Rough in (decks less than 36” above grade), plumbing on test, air seal, electrical sticker in place, duct blasting report.
9. Insulation
10. Final, final electric sticker in place and energy efficiency certificate in place.
11. Final grade
12. Special inspections may be required for alternative construction methods

INTERNATIONAL RESIDENTIAL CODE 2015 OR INTERNATIONAL BUILDING CODE 2015 APPLIES.

NOTE: Inspectors may make unscheduled visits at any time during normal working hours.
NOTE: A Use and Occupancy Permit will be mailed after all three final inspections have been successfully completed and documented.

SCHEDULING INSPECTIONS:

To schedule an inspection, please call: 304-264-1966. All inspection requests for next working day must be called in no later than 2:00 pm.

Be prepared to provide the following information:

1. Permit #
2. Type of Inspection
3. Requested inspection date
4. Name of person requesting inspection

NOTE: Inspection will be completed in a timely manner, although no appointments are possible. The earliest date available will be given when scheduled.

APPROVED ELECTRICAL INSPECTORS: (third-party inspector, separate fee to be paid directly to electrical inspector)

Middle Department Inspection Agency, Inc. -------------------------------Wes Clark, Inspector---------1-800-248-6342

**Floodplain**

Any construction needs to be reviewed and approved by The County Floodplain Administrator prior to start of construction. Contact Berkeley County Planning Department at (304)263-1963.

Any change to the application or building plans before plan review will be subject to a $25.00 administrative fee. If the application or building plans have been reviewed, an additional fee of $50.00 will be added to the administrative fee.
BUILDING PERMIT APPLICATION CHECKLIST
PLEASE COMPLETE THIS CHECKLIST TO HELP ENSURE MINIMAL DELAYS IN PROCESSING YOUR APPLICATION. THIS COMPLETED CHECKLIST IS REQUIRED WITH ANY APPLICATIONS FOR NEW HOMES OR ADDITIONS.

___Basement or ___crawl       _____ # of stories above grade
If basement, then depth below grade each wall:  Front___  Left___  Right___  Back___
Ceiling height:  Basement___  First ___  Second___  Third ___
Is basement conditioned (heated/ cooled?) ___ Yes   ___No
Brick or stone veneer ___Yes ___No
Assumed Soil Bearing ___________ psf
Sewer & water check applicable
Water tap ___     Well ___
Sewer tap ___     Septic ___

Required paperwork: check as completed
__ Application
__ Directions to property from 400 W Stephen Street
__ Assessor and planning sign-off
__ Construction drawings (2 sets)
__ Completed construction agreement with plot plan (for new homes only)
__ Individual LVL and I joist specifications and layout for I joists
__ WV engineer seal for steel beams and suspended slabs
__ Truss specifications and layout

Energy compliance information (insert actual values)
__ U values for windows  ____ U values solid core doors  ____  U value Skylights
__ U values patio doors  ____ U values sliding glass doors
R values
__ Ceiling  ____  Walls  ____  Floors  ____  Perimeter slabs
__ Basement walls  ____ Depth of insulation  Insulate basement / garage wall ___Yes___ No

HVAC
____ Heat pump hspf value (minimum 7.7)
____ Cooling (minimum 13 seer)
____ Furnace afue

Fuel Fired Appliances:  Furnace _____  Water Heater_____  Wood Stove_____  Fireplace_______

Log homes
___Log size  ____________  Species
CONSTRUCTION DOCUMENT CHECKLIST

1. Assumed soil bearing (less than 1500 psf or greater than 2000 psf will require an accompanying geotechnical report.

2. Concrete compressive strength for all poured concrete.

3. All foundations
   A. Wall height.
   B. Wall thickness.
   C. Reinforcing information where required.
   D. Plan layouts for precast wall systems from supplier.
   E. Depth of unbalanced fill for each wall.
   F. Drain tile and damp proofing information.
   G. Perimeter footing size (width & thickness).
   H. Pier sizes, locations and spacing.
   I. Size and location for all thickened slabs.
   J. WV engineer approval of suspended slabs.
   K. Radon locations and electrical box for future fan.
   L. R value of any perimeter slab insulation.
   M. Column size, type and load capacity.
   N. Column to beam connection method.

4. Full basements
   A. Egress requirements.
   B. R values for wall insulation, depth of insulation and identification of all walls to be insulated if basement is conditioned.
   C. R values for pipe wrap and duct insulation for non conditioned basements.
   D. Finished basement, room identification.

5. Crawl space
   A. Post size for wood posts.
   B. Block pier size and orientation if not square.
   C. R values for pipe wrap and duct insulation for all under floor ducts and piping.
   D. Crawl access location and size.
   E. Crawl vent locations and any mechanical venting information.
   F. Identify support of HVAC equipment (example-hvac suspended in crawl by double joist).
   G. Note on plans crawl space light.

6. Typical wall section
   A. Species and grade for lumber joists and beams.
   B. Species and grade of lumber for studs.
   C. Size of sill plate and method of attachment.
   D. If mudsill straps are to be used with a spacing greater than 3’ on center then provide ICC ES report stating spacing.
   E. Any required header information.
   F. Typical wall section required to match number of stories on building plans.
   G. All pertinent information to include material sizes and dimensions from the bottom of the footing to the top of the roof.

7. General
   A. Plans to be in the correct orientation (not reversed) and legible, I joists and truss layouts in same orientation.
   B. Additions, attached decks, porches, garages and new homes require a site plan from a design professional.
   C. All habitable rooms to be labeled (bonus room is not acceptable).
   D. Actual window sizes to be used.
   E. Identify all tempered windows.
F. Identify the egress window in each sleeping room including clear opening size and height of sill above finished grade for grade floor windows using the 5.0 s f option.

G. Identify on plans if windows are true double or triple windows or single windows with studs between.

H. Exit door and size.

I. House / garage door type and size with self closing device.

J. All header sizes, include individual lvl specifications where used.

K. U values for all windows and exterior doors.

L. Manual J and Manual D through the wrightsoft program which is a diagram or layout of the house with duct work and cfsms going into each room.

M. Garage / house separation.

N. Protection of supporting structure for rooms above garage.

O. HVAC or water heater in garage, elevation of ignition source.

P. Attic access.

Q. Hall and stairwell widths.

R. Smoke detector locations and interconnection/carbon monoxide if applicable.

S. Truss specifications.

T. Rafter, ceiling joist and ridge sizes, species and grade of lumber.

U. I joist layouts and specifications for floor or roof application.

V. Note on plans attic light.

W. Note on plans catwalk with attic HVAC unit.

X. WV engineer approval of non standard roof systems.

Y. A flood elevation certificate is required for new construction if any part of the lot is in the flood plain.

Z. Remove any non applicable pages from plans.

AA. Indicate Prescriptive Method of compliance with 2009 IECC or provide a completed 2009 REScheck done on a per house basis to be provided by the contractor for all new homes and additions that add living space. The REScheck program is available at www.energycodes.gov

BB. Street address at the property or mailbox at final inspection.

CC. Modular home plans require third party inspection agency stamp on both sets of plans.

DD. Separate detail required to include garage wall height, height of garage door opening and method of braced wall panel. Include stem walls on detail if required for compliance.
**Requirements for obtaining a permit**

Any minor changes to the plans will require an approved plan change. This includes change of contractor. Major changes (adding extra space and reversing plans) will require the permit to be voided and a new permit obtained. Repair specifications for damaged trusses or joists are to be provided in the office at or prior to the rough in inspection. Changed truss specifications, due to different manufacturer must be submitted as a plan change prior to rough in inspection. Failure to do so will result in a $50.00 reinspection fee. This applies to either floor or roof trusses. The applicant must sign any plans at the time of submission. The permit and approved set of plans must be available on the job site for any inspection. If the job site is not visible from the road then place a sign that is visible at the driveway entrance. In subdivisions, lot numbers are to be posted. Failure to comply with these requirements will result in a not approved inspection and $50.00 reinspection fee. The inspectors cannot inspect what they cannot find.

Failure to contact this office for any inspections within six (6) months of permit issuance or prior inspection will result in the permit being voided and an unsafe structure sign being placed on work already completed. This sign will not be removed until a new permit has been issued. Persons using or occupying structures without a Use and Occupancy permit will be given notice to vacate until such permit is obtained. An unsafe structure sign will be placed on the structure until the Occupancy permit is obtained. Such unsafe structure signs are not to be removed by anyone other than Berkeley County Engineering staff.

Federal EPA requirements effective April 22, 2010 state that any structure built before 1978 **SHALL** be tested for Lead Paint by a certified renovator.

Stated Federal Guidelines require existing structures to be tested for Asbestos containing materials prior to remodeling or demolition.

I have read and agree to the above conditions.

Applicant______________________________ Date ______________
Certificate of Occupancy

_____ Fax Certificate of Occupancy  $30.00
    Fax Number__________
    Will be issued once all paper work is completed including final electric.

_____ Expedited Certificate of Occupancy $89.00
    Phone Number____________________
    Will be issued once all paper work is completed including final electric.

All other Certificate of Occupancies will be mailed.

_____ No Certificate of Occupancy required for non habitable spaces such as decks, storage buildings, pools, etc.

No change in options after Permit is issued.
