

THIS AREA SHOWN AT A SCALE OF 1"=500' ON PANEL 540282 0106

THIS AREA SHOWN AT A SCALE OF 1"=500' ON PANEL 540282 0107

THIS AREA SHOWN AT A SCALE OF 1"=500' ON PANEL 540282 0108

THIS AREA SHOWN AT A SCALE OF 1"=500' ON PANEL 540282 0109

**LEGEND**

**SPECIAL FLOOD HAZARD AREAS INUNDATED BY 100-YEAR FLOOD**

**ZONE A** No base flood elevations determined.

**ZONE AE** Base flood elevations determined.

**ZONE AH** Flood depths of 1 to 3 feet (usually ponding); base flood elevations determined.

**ZONE AD** Flood depths of 1 to 3 feet (usually flow on sloping terrain); average determined. For areas of elevated flow, velocities also determined.

**ZONE A99** To be protected from 100-year flood; Federal flood protection system construction; no base elevations determined.

**ZONE V** Coastal flood with velocity hazard action; no base flood elevations shown.

**ZONE VE** Coastal flood with velocity hazard action; base flood elevations determined.

**FLOODWAY AREAS IN ZONE AE**

**OTHER FLOOD AREAS**

**ZONE X** Areas of 500-year flood; an 100-year flood with average depth of less than 1 foot or with drainage area less than 1 square mile area protected by levees from year flood.

**OTHER AREAS**

**ZONE X** Areas determined to be outside year flood plain.

**ZONE D** Areas in which flood hazard undetermined.

**Flood Boundary**

**Floodway Boundary**

**Zone D Boundary**

**Boundary Dividing Special Hazard Zones**

**513** Base Flood Elevation Line in Feet\*

**(D)** Cross Section Line

**(EL 987)** Base Flood Elevation in Feet Where Uniform Within 100 Feet

**RM7X** Elevation Reference Mark

\*Referenced to the National Geodetic Vertical Datum of 1929

**NOTES**

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly local drainage sources of small size, or all planimetric features outside flood hazard areas. The coastal flooding elevations shown may differ significantly from those developed by the National Weather Service for hurricane evacuation planning.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show on this map. Floodway widths are provided in the Flood Insurance Study Report. Elevation reference marks are described in the Flood Insurance Report.

Coastal base flood elevations apply only landward of 0.0 NGVD. Coastal base flood elevations shown on this map include the effect of wave action.

For adjoining map panels see separately printed Map Index.

**MAP REPOSITORY**

Planning Office, 212 S. College Street, Martinsburg, West Virginia. (Maps available for reference only, not for distribution.)

**INITIAL IDENTIFICATION:**  
DECEMBER 16, 1977

**FLOOD HAZARD BOUNDARY MAP REVISIONS:**  
NONE

**FLOOD INSURANCE RATE MAP EFFECTIVE:**  
AUGUST 4, 1988

**FLOOD INSURANCE RATE MAP REVISIONS:**  
NONE

Refer to Flood Insurance Rate Map Effective date shown below to determine when actuarial rates apply to structures in zones and elevations or depths have been established.

To determine if flood insurance is available, contact an insurance agent or call the National Flood Insurance Program at 638-6620.
